LEWIS'S WOODPECKER BIRD HOUSE PLANS

**NOTES:**

- Use [Breckenridge] siding or cedar
- All screws should be galvanized, 1 5/8" long.
- Galvanized nails may be used in lieu of screws, but screws are recommended.
- Wood does not need to be finished, but a non-caustic paint or finish is recommended.
- Attach bark to front face (only) of bird house with gorilla glue and staples or finish nails.

**TOOLS REQUIRED:**

- Circular saw / hand saw
- Table saw (if available)
- Drill with 2" hole saw bit
- Pneumatic stapler or finish nailer (hammer and nails will suffice)
