Totals from raw data	989.18	85,139	230	

Notes: This data includes the Winter Raptor numbers from the 2018-19 season. It has been suggested that truer numbers would be to only include those routes done locally. I think we could do this if we asked the local route runners to say how long their route is and how many times they did it.

This doesn't list all of the volunteers working on some of the projects i.e. Kestrel Boxes, Green Ridge and Sage-grouse. Leaders on those projects just sent aggregate numbers for hours, miles, and volunteers
